HARROLD'S PANSY GARDENS & GREENHOUSES.

P. O. BOX 29 — GRANTS PASS, OREGON.

MANY NEW THINGS FOR 1949

With the New Year comes the time when the professional grower begins to look about for stock to meet his profitable spring season demand. Many items should be planted now as soon as stock can be procured and others soon will be seasonal. Specialist houses such as HARROLD'S are an ideal source for seasonal material of the finest quality for two reasons. In the first place we breed and grow a substantial number of our specialties from the breeding to the finished product and all of this effort is concentrated toward producing the highest possible quality. Secondly where we do not actually develop and produce an item that we catalogue you can rest assured that it is the product of another outstanding specialist in that particular field. Our operation is organized entirely on the production and distribution of these specialties in as direct a line from breeding to your cultures as possible.

ORDER EARLY: Our operation and staff is steadily growing as it has for the past 46 years. In order, however, to maintain the meticulous care that we do in development and production, expansion is of necessity a matter of steady growth. Therefore you will help us to serve you better by anticipating your needs sufficiently to allow careful processing and assembly of your order. On seeds we will supply **FREE AIR-MAIL RETURN** on orders amounting to \$2.50 or more arriving by air and accompanied by full remittance. This has been a regular Harrold service for more than 18 years.

Plant These Now!

TUBEROUS BEGONIAS:

While this has been a retail specialty with us for a number of years 1949 is the first time that we have been able to offer our professional customers this stock at trade prices. Even this season dormant tubers will be restricted in quantity but we will have a good supply of seed, seedling plants and plants grown from tubers.

DORMANT TUBERS: See our Harrold's Review of November 15th. which has been sent to you. If it's been lost ask for another copy. These are planted from now until the end of March for plants to sell this spring.

SEEDS: Plant these now and until February 20th., the earlier the better. Planted during January they can be had in bloom in May or June.

SEEDLING PLANTS: We'll have about 50,000 of these starting in February, just right for potting up for spring sale. Order early.

TUBER PLANTS: More costly but will bloom earlier. These will be offered in a later edition of this publication.

(Complete 20 page instruction booklet with all orders)

PANSIES:

SEEDS: Now is a good time to plant for your main spring selling season. Seeds of these planted by February 20th. can be had showing bloom by Memorial Day or earlier on plantings made earlier than that date. These make excellent stock for spring sale and they bloom more freely during the summer than the fall planted stock.

PLANTS: We have a few thousand of these from our fall plantings, possibly enough to meet the normal demand until early March. We can't book to hold and will supply these as long as the supply lasts. See the Harrold's Review of September 20th., 1948 for list of these.

VIOLAS:

SEEDS: We have an extensive stock of these seeds as listed in this edition. Handle the same as Pansies mentioned above for spring plants.

PLANTS: We have none available this spring.

(FREE booklet on Pansy and Viola culture with all orders)

HARDY PRIMROSES:

SEEDS: Plant these now for 3 inch pot plants for spring sale. A few will show color this spring. Plant through May for nice plants to sell next fall for good bloom next spring.

PLANTS: Order our two year old plants for spring bloom and sale now. These will give excellent bloom **THIS** spring.

PERENNIAL PLANTS:

PLANTS: These are a specialty with us in over a hundred kinds. The stock we supply is all one and two year old and suited to spring sale. Potted up in 3's or 4's they make a popular item.

HARDY CARNATIONS: These are an especially popular item. Including all of the popular Hardy Border Carnations in about 50 colors and types. You will find these offerings of especial interest.

Tuberous Begonia Seeds

Many professional florists find it very profitable to grow Tuberous Begonia plants for their bedding plant trade. Seeds may be planted from late December through February and bloom the same season. Where summers are cool the later plantings do well but if summers are hot it is necessary to make these plantings during the first half of that period so the plants will be well established during the cool days of late spring. The plants are transplanted twice and set out of doors after danger of late frost is past when they are about 4 or 5 inches high. Normally such plants will start blooming in late June or July and continue up to frost.

The tubers they produce are lifted in the fall and may be used for pot plants the following season. The seeds are extremely fine and require careful attention to culture in the early stages about like the culture given fibrous rooted Begonias. The entire detail is explained in our 20 page, 10,000 word culture booklet that covers all phases of this culture. A copy is supplied **FREE** with each shipment of seeds, plants or tubers and assures pleasing results with minimum care.

These seeds we offer here are recommended because of the varied colors and types produced. They are the results of planned crossing by hand in our greenhouses and will contain practically every type now known as our collection consists of all the currently known types in the widest range of colors. In a planting of several hundred you will probably not find many alike. These seeds are packeted in regular packets containing about 750 seeds from which, with good luck you may produce upwards of 400 plants. The price is \$2.50 per packet; 3 packets for \$5.00; 10 packets for \$15.00.

SEPARATE TYPE SEEDS: We can also supply Camellia type, Carnation type and Crispa type seeds separate as to type but mixed colors. These are packeted about 500 seeds to the packet. Price is \$2.50 per packet; 3 packets for \$6.00.

IT IS SUGGESTED that you grow some plants from tubers for early bloom so your customers can see what these flowers are like at setting time. You'll also find the growing of plants from tubers for sale to be profitable. A full list of these will be found in our Harrold's Review mailed to you November 15th. If you have mislaid it another copy can be obtained on request. This is one group of stock you will want to try out this spring for its popularity is growing fast.

Pansy Seeds

Spring Planting of Pansies

While Pansies in the main are usually planted in July, August and September; transplanted outdoors in the fall and wintered either in open beds under mulch, or in coldframes for sale the following spring, it is possible and practical to plant them during January and February in the greenhouse and obtain good salable stock for April and May. In this case they are handled very much the same as the popular annuals with the exception that they may be moved out into cold-frames or outdoor beds much earlier than most stock without danger of loss.

Seeds should be sown in flats filled with three-fourths good garden loam and a fourth of well rotted cow manure or rich compost. Sandy loam is preferable or soil from which the green part of a heavy sod has been skimmed. It is desirable to have a good fiber or humus content to this soil and it will handle better if worked through a four to the inch mesh screen. Plant the seeds broadcast on a lightly tamped surface and cover lightly with granulated peat moss or the same soil as used in the flat. Again tamp lightly. Cover only about $\frac{1}{16}$ inch deep or just enough to hide the seeds. Keep in a temperature of 45 to 50 degrees at night until germination takes place. Until germination occurs avoid any dryness of the seed bed. Afterwards, however, supply just enough moisture to keep the plants from suffering. Over watering at this stage will cause trouble from damping off. If this should bother reduce moisture still farther and treat the affected area liberally with Flowers of Sulphur. Plants should be transplanted from the seeding flat when they have 6 to 8 leaves.

Grow Pansies continually on the cool side and allow good ventilation on bright days. Do not transplant more than 60 plants to the standard florist flat which should be 3 inches or more deep. Dirt bands 2x2 inches may be used for transplanting with excellent results. As soon as severe freezing is past these plants may be shifted to unheated frames with glass sash or in milder localities into open beds. If glass sash is used over the plants use them only in freezing weather or at night. Give the plants all the open sunlight possible. They will make their most rapid growth at this stage when nights are cool and days warm and sunny. Pansies may easily be moved out of the greenhouse before you require the space for the spreading of other annual stock and for that reason they are very economical to grow in point of equipment time and operation. Except for the months of January and February, heat will hardly be required unless it is in the most northerly locations and at no time will heat be a critical requirement so long as it is above 38 degrees after germination takes place.

Harrold - Originations

HARROLD'S UNUSUAL NOVELTIES

VARIETY	PER 500 seed pkt. ($\frac{1}{16}$ -oz.)	$\frac{1}{4}$ -oz.

STANDARD PANSY VARIETIES

AMERICAN GROWN SEED

In this group we offer a most complete line of well known American strains in the finest stock of each available. Our prices are competitive with seeds of equal quality from any other source and this selection is offered so that you can make Harrold's your complete Pansy and Viola headquarters.

POPULAR MIXTURES

VARIETY	PER 1,000 seed pkt. ($\frac{1}{8}$ -oz.)	$\frac{1}{4}$ -oz.	$\frac{1}{2}$ -oz.	1-oz.	2-ozs.
Early Pansy America: Good size & color.	\$.75	\$1.50	\$2.75	\$5.00	\$ 9.00 \$17.50
Engleman's Giant: Dark and light shades.	.75	1.75	3.25	5.75	10.00 19.00
Engleman's Special: Red & bronze shades.	1.00	1.75	3.25	6.25	12.00 22.00
Giants of the Pacific: New Calif. strain.	1.00	1.50	2.75	5.00	9.00 17.50
Geneva Giants: A select super-swiss strain.	1.00	1.75	3.25	6.25	12.00 22.00
Jumbo Mixed: (Steele) Harrold grown first generation re-selected from orig. stock.	1.00	1.75	3.25	6.25	12.00 22.00
Maple Leaf Giants: Robust and compact.	.75	1.50	2.75	5.00	9.00 17.50
Oregon Giants: Mixed types of good size.	1.00	1.75	3.00	5.75	11.00 20.00
Super Maple Leaf: Improved re-selection.	1.00	1.75	3.00	5.75	11.00 20.00
Scottish Exhibition Mixed: A nice blend.	1.00	1.75	3.00	5.75	11.00 20.00
Super Swiss Mixed: Select 5 blotched.	1.00	1.75	3.00	5.75	11.00 20.00
Swiss Giant Mixed: 3 & 5 blotch marking.	.75	1.50	2.75	5.00	9.00 17.50
Dwarf Swiss Mixed: Dwarf habit large fl.	1.00	1.75	3.00	5.75	11.00 20.00
Trimardeau Giants: Good bedding type.	.75	1.25	1.75	3.25	6.00 10.00

SEPARATE COLOR VARIETIES

This separate color group affords a wide selection and is, we believe, the finest selection available from a single source in this country.

VARIETY	PER 1,000 seed pkt. ($\frac{1}{8}$ -oz.)	$\frac{1}{4}$ -oz.	$\frac{1}{2}$ -oz.	1-oz.
Coronation Gold: Largest pure yellow self.	\$1.00	\$2.00	\$3.25	\$6.25 \$12.00
Delft Blue: Porcelain blue.	1.00	2.00	3.75	7.25 14.00
Baby Delight: Miniature Pansy about 8" high. Flowers light blue, face; size of a quarter.	1.00	1.40	2.25	4.25 8.00
Mrs. A. H. Scott: Miniature, Beaconsfield coloring.	1.00	1.40	2.25	4.25 8.00

SWISS GIANT TYPE SEPARATE COLORS.

Alpenglow: Dark red shades.	1.00	2.00	3.25	6.25	12.00
Black King: Largest size black Pansy.	1.25	2.50	4.75	9.25	18.00
Blumilalp: Soft pink & rose velvet blotch.	1.00	2.50	4.75	9.25	18.00
Fire Beacon: Wallflower red, velvet blotch.	1.00	2.00	3.25	6.25	12.00
Lake Of Thun: Thuner Sea or Ulswater Blue. Very brilliant blue, dark center.	1.00	2.00	3.25	6.25	12.00
Orange Giant: Rich light orange self.	1.00	4.00	7.50	12.00	22.00
Pure White: Ruffled white of good size.	1.00	2.00	3.25	6.25	12.00
Raspberry Rose: Soft pink, velvety wine blotch.	1.00	2.25	4.00	6.75	12.00
Rheingold: Deep yellow, dark blotch.	1.00	2.00	3.25	6.25	12.00

IMPORTED PANSY SEED

This imported Pansy seed is from the foremost European specialists, our same pre-war source of these varieties. This group affords some added types of interest and supplies cheaper seeds where price is a major consideration. The mixtures do in some respects differ from those produced by American specialists and for that reason add novelty and scope to your selection. The bedding type separate colors are useful where a mass of bright color is desired rather than very large sized individual flowers.

USEFUL MIXTURES

VARIETY	PER 1,000 seed pkt. ($\frac{1}{8}$ -oz.)	$\frac{1}{4}$ -oz.	$\frac{1}{2}$ -oz.	1-oz.
Bugnot's Superb Blotched: Fancy type mixture.	\$.50	\$.90	\$1.25	\$2.25 \$ 4.00
Cassier's Three & Five Blotched: Fine mixture.	.50	.90	1.25	2.25 4.00
Englemann's Special: Originator's. Compact.	2.00	4.00	7.00	12.00 20.00
Orchid Flowered Mixed: Delicate pastel shades.	1.00	2.00	3.25	6.25 12.00
Swiss Giant Improved: Quite a good strain.	.50		2.25	4.00 7.50

BEDDING TYPE GIANTS IN SEPARATE COLORS

These do not compare in flower size with other separate colors we offer in the above group of American strains. They are valuable because they afford colors distinctly characteristic of this group and they do come truer from seed than the larger flowering sorts. For borders to give a mass effect or for brilliant and striking beds planted to a color plan these are recommended.

VARIETY	PER 1,000 seed pkt. ($\frac{1}{8}$ -oz.)	$\frac{1}{4}$ -oz.	$\frac{1}{2}$ -oz.	1-oz.
GIANT TRIMARDEAU: A French group that has been used for years and is probably the best known for their brilliant, large flowers.				
Adonis: Light blue with white eye.	\$.50	\$.90	\$1.25	\$2.25 \$4.00
Candidissima: Snow white.	.50	.90	1.25	2.25 4.00
Cardinal Red: As named. Showy.	.50	.90	1.25	2.25 4.00
King Of The Blacks: Black-purple.	.50	.90	1.25	2.25 4.00
Lord Beaconsfield: Violet blue and white.	.50	.90	1.25	2.25 4.00
Prince Henry: Rich dark blue.	.50	.90	1.25	2.25 4.00

GIANT BEDDING: Another group of brilliant coloring for borders or beds.

Orange King: Brilliant orange & apricot.	.50	.90	1.25	2.25	4.00
St. Knud: Deep orange yellow.	.50	.90	1.25	2.25	4.00

HIEMALIS: Sometimes listed as Ice Pansies because of their extremely early flowering habits. Flower size just about half that of American Giant types but freely produced.

Blue Boy: Silvery lilac.	.50	.90	1.25	2.25	4.00
Celestial Queen: Brilliant sky blue.	.50	.90	1.25	2.25	4.00
Claret: Deep wine red.	.50	.90	1.25	2.25	4.00
March Beauty: Dark velvety purple.	.50	.90	1.25	2.25	4.00
Northpole: Glistening pure white.	.50	.90	1.25	2.25	4.00
Orion: Pure golden yellow.	.50	.90	1.25	2.25	4.00

Viola Seeds

THE MOST VALUABLE AND OUTSTANDING VARIETIES

Have you considered Violas recently? They are a useful addition to your Pansy line and in many places where they have been offered they have developed a profitable demand. Normally this demand will usually not exceed 10% to 25% of your Pansy demand but in many instances that is definitely worthwhile.

The culture is so identical with that of Pansies that they may be planted and handled in the same way with very satisfactory results. They may be set in fall or spring into the flowering beds in the same manner and if any difference is noted it is that they are a bit harder and more easily wintered than Pansies. We suggest that if you haven't tried them yet in your market you make a planting of three or four packets in the most popular colors and see how easily they are grown and how the customers go for them once they see some of these modern varieties in bloom.

GEM VARIETIES

This is a group of four colors and mixture that is possibly best known by the habit but vary some in flower form. White and Yellow Gem rather closely resemble Jersey Gem. Lavender Gem produces a flower that is a bit smaller and less full in form. All bloom profusely over a very long season.

VARIETY	PER 1,000 seed pkt. ($\frac{1}{8}$ -oz.)	$\frac{1}{4}$ -oz.	$\frac{1}{2}$ -oz.	1-oz.
Jersey Gem: Compact violet blue.	1.00	\$2.50	\$4.75	\$9.00 \$16.00
Lavender Gem: Brilliant lavender blue.	1.00	2.50	4.75	9.00 16.00
White Gem: A very fine giant pure white.	1.00	2.50	4.75	9.00 16.00
Yellow Gem: A large very bright yellow.	1.00	2.50	4.75	9.00 16.00
Gem Varieties Mixed: All the above blended.	1.00	2.50	4.50	8.50 15.00

VIOLA CORNUTA and HYBRIDA

This group covers many varieties of much interest to the grower. The strains are the best obtainable and uniformity is unusual for this type of stock.

VARIETY	PER 1,000 seed pkt. ($\frac{1}{8}$ -oz.)	$\frac{1}{4}$ -oz.	$\frac{1}{2}$ -oz.	1-oz.
Admiration: Large dark blue.	.75	\$1.00	\$2.00	\$3.75 \$ 7.00
Apricot: Apricot yellow tinted orange.	1.00	1.75	3.00	5.75 11.00
Arkwright Ruby: Ruby red blotched center.	1.00	1.50	2.25	4.25 8.00
Blue Elf: Top deep violet, bottom lighter.	.75	1.50	2.50	4.75 9.00
Blue Perfection: Large purple blue.	.75	1.00	1.75	3.25 6.00
Chantreyland: Finest pure apricot.	.75	1.50	2.50	4.75 9.00
King Henry: (Purple King) Rich violet blue.	1.00	1.75	3.25	6.25 12.00
Lutea Splendens: Clear golden yellow.	.75	1.50	2.25	4.25 8.00
Papilio Light Blue: Soft blue, white center.	.75	1.50	2.50	4.75 9.00
White Perfection: Large pure white.	.75	1.25	2.25	4.25 8.00
Improved Scotch Bedding: Newest bedding hybrids	.75	1.25	2.25	4.25 8.00

HARDY PRIMROSES

Polyanthus - Veris Hybrids

Harrold's Pedigreed Giants

Developed in our breeding department after many years intensive work, we believe this to be the finest in this type. The plants are pleasingly compact but of robust growth, usually about 8 to 10 inches high. Flower stems are 12 to 16 inches under good culture setting the flowers well above the foliage. The flower heads, composed of many florets which are often individually larger than a silver dollar, are often 8 inches and more across. Coloring is the most brilliant of any strain available in this type. While available in MIXED COLORS ONLY the blend contains yellow, red, purple and white in the more common shades plus pink, flame and bronze shades in pastel and poly-chrome combinations that are rare. A few blue shades are in the mixture. Marking of the flowers is just as outstanding with selfs, blotched and lace marked flowers.

FRESH TESTED SEEDS

Price Per Trade Packet, about 400 seeds, \$1.00; 3 packets for \$2.50; $\frac{1}{8}$ oz., about 1500 seeds \$4.00; $\frac{1}{4}$ oz., \$7.50; $\frac{1}{2}$ oz., \$14.00; 1 oz., \$25.00; 2 ozs., \$50.00; 2 ozs., \$95.00.

BLOOMING AGE PLANTS

From 1947 plantings. Transferred now these will give good color showing this spring
PRICE — 10 for \$2.50; 25 for \$4.25; 50 for \$8.00; 100 for \$15.00; 1,000 for \$130.00. 250 at the 1,000 rate.

OTHER HARDY POLYANTHUS

PACIFIC GIANTS — A giant strain from an outstanding Oregon specialist including the best of his collection. Of giant size and wide color range which is heavy in the softer shades. A very fine mixture.

OLYMPIC GIANTS — Still another strain from two outstanding collections grown in Washington State. Basically from Pfitzer's Colossea and English types but rebred to American habit and color standards. All of these types are better suited to American markets and climates than fresh imports.

SEED PRICES: These two — Per packet, about 400 seeds, \$1.00; $\frac{1}{8}$ oz., \$3.50; $\frac{1}{4}$ oz., \$6.50; $\frac{1}{2}$ oz., \$12.00; 1 oz., \$22.00; 2 ozs., \$40.00; 2 ozs., \$75.00.

PRIMULA CASHMERIANA

Here is a variety that will be found to be most interesting. Plants are about 10 inches high and florets about $\frac{1}{2}$ an inch across, produced in large, dense heads that are very showy.

DENTICULATA: Lilac flowers. Seed per 300 seed packet, \$1.00; 3 for \$2.50.
(PRIMULA — Continued in next column)

PRIMULA CANDELABRA

Here is an interesting and valuable variety in the hardy group. It is well suited to planting around a pool or along the edge of streams. They require a good deal of summer moisture but fair drainage in the winter months when the crowns are dormant.

P. PULVERULENTA: Probably the most useful of the group. Flower stalks are to three feet consisting of many florets an inch or more across making colorful flower heads several inches across. Coloring is brilliant in purple and reds with orange-brown eye. A very interesting sort you will find useful.

SEEDS: Packet, about 400 seeds, 50¢; 3 for \$1.25; $\frac{1}{8}$ oz., \$3.00; $\frac{1}{4}$ oz., \$5.00; $\frac{1}{2}$ oz., \$8.50; 1 oz., \$16.00; 2 oz., \$30.00.

PRIMULA AURICULA

A popular alpine for shaded rockery. Requires alpine situation with sandy, rocky soil and free drainage. Flowers are quite large in rather medium clusters and coloring is most varied, including shades of yellow, brown, blue, red, rose and pastel shades. Usually with a beautiful contrasting center in each floret.

SEEDS: Per packet about 300 seeds, \$1.00; 3 packets \$2.50.

NOTE: In culturing Primula in mixture the color blend will, like Pansies, be affected to an extent by the germination obtained. The rare and finer shades are the least robust and when germination drops these are the ones first lost. Because of this, different plantings may develop what appears to be an entirely different color range.

Tuberous Begonia

SEEDLINGS

HARROLD'S PEDIGREED HYBRIDS

Beginning in February we will supply seedling tuberous Begonia plants produced from our outstanding collection of this stock from hand-pollinated seeds. Our collection consists of over 15 types in a full range of colors including Camellia double, Carnation double, Crispa, Cristata, Rosebud, Narcissiflora, Picotee, Marginata, Marmorata, Peony and the Water-lily types. This strain is produced from planned crosses of these types and will throw many unusual plants the same as the seeds offered on the front page of this folder. Available in mixed types and colors only.

These seedlings were planted in Nov. and Dec. and are ready to pot into 3 inch pots on arrival. With proper culture they may be had in bloom by late April or May. Our 20 page cultural booklet accompanies every shipment and gives all necessary information for success. These are shipped bare root in moss and special packing that has given excellent delivery to East Coast points this past season.

PRICE: \$5.00 per 100 (not less than 100 sold); 250 for \$11.00; 1,000 for \$42.50 transportation paid. 500 at the 1,000 rate. All orders will be shipped in rotation of booking as rapidly as stock is ready. For earliest bloom prompt booking is advised.

FOR BEGONIA TUBERS: See our Harrold's Review of November 15th. Another copy gladly supplied if you have misplaced yours.

Perennial Plants

ONE YEAR OLD FIELD GROWN

These plants are all grown in sandy loam soil and will be fine for spring sale and planting. The supply this spring is spotted due to unseasonal weather that affected germination at planting time last year so it is suggested that you order early while selections are complete.

VARIETY	Price per 25	100
ALYSSUM — Madwort, Gold Dust or Basket of Gold.		
Saxatile Compactum: Golden yellow, about 12" tall.	\$1.25	\$ 4.00
BELLIS — English Daisy.		
Monstrosa Mixed: Giant all double mixed.	1.25	3.50
Monstrosa Rose: Giant double pure rose.	1.25	3.50
Giant Snowball: Double pure white.	1.25	3.50
Tubulosa Aetna Red: Double quilled bright red.	1.35	4.00

WALLFLOWER —		
Choice Double Flowered Mixed: A striking color range.	1.25	4.00

TWO YEAR OLD PLANTS

This group consists of a few items we carried over from the 1946-47 plantings. They are to be highly recommended where a heavy, immediate effect is required and will give a nice lot of flowers this season - probably two or three times as many as the yearling stock. Some items are not duplicated in the younger selection.

VARIETY	Price per 25	100
DAISY SHASTA —		
Double Shasta: A nice double and semi-double Daisy.	3.50	10.00
Shasta Alaska: Long stemmed single.	2.50	7.50
